Springfield Local Schools Offers Open Computer Lab for Community

Starting March 18th Springfield will open the High School Library Computer Lab for community use. Students will be available to offer instruction and answer questions. The lab will be open on Wednesdays from 4:00–6:00. Adults are welcome to drop by anytime during those hours.

Citizens must agree to follow the Acceptable Use Policy. They can sign up for email, browse the Internet, create documents or just become familiar with computers. This will be a four-week pilot program. If there is sufficient interest, we will continue the program. Please contact Marilyn Croskey, Director of Technology, with any questions (330) 798–1155. We hope this will be a valuable experience.
